Screen #01: Public Citizen Portal - Homepage & Hero

Citizen & Public

WIREFRAME SPECIFICATION

Target Route:

`/`

Layout Architecture:

Public landing portal with search gateway, fast statistics, feature cards, and direct links to ordinances, news, and incident reporting.

Core UI Skeleton Elements:

[1] Top Navbar: Brand logo, navigation links, theme toggle, and Sign In action

[2] Hero Section: Search bar with instant autocomplete and scope selector

[3] Metrics Strip: Total ordinances, active barangays, and resolved incidents

[4] Navigation Feature Cards: Ordinance Explorer, AI Chatbot, Community Reports, Civic News

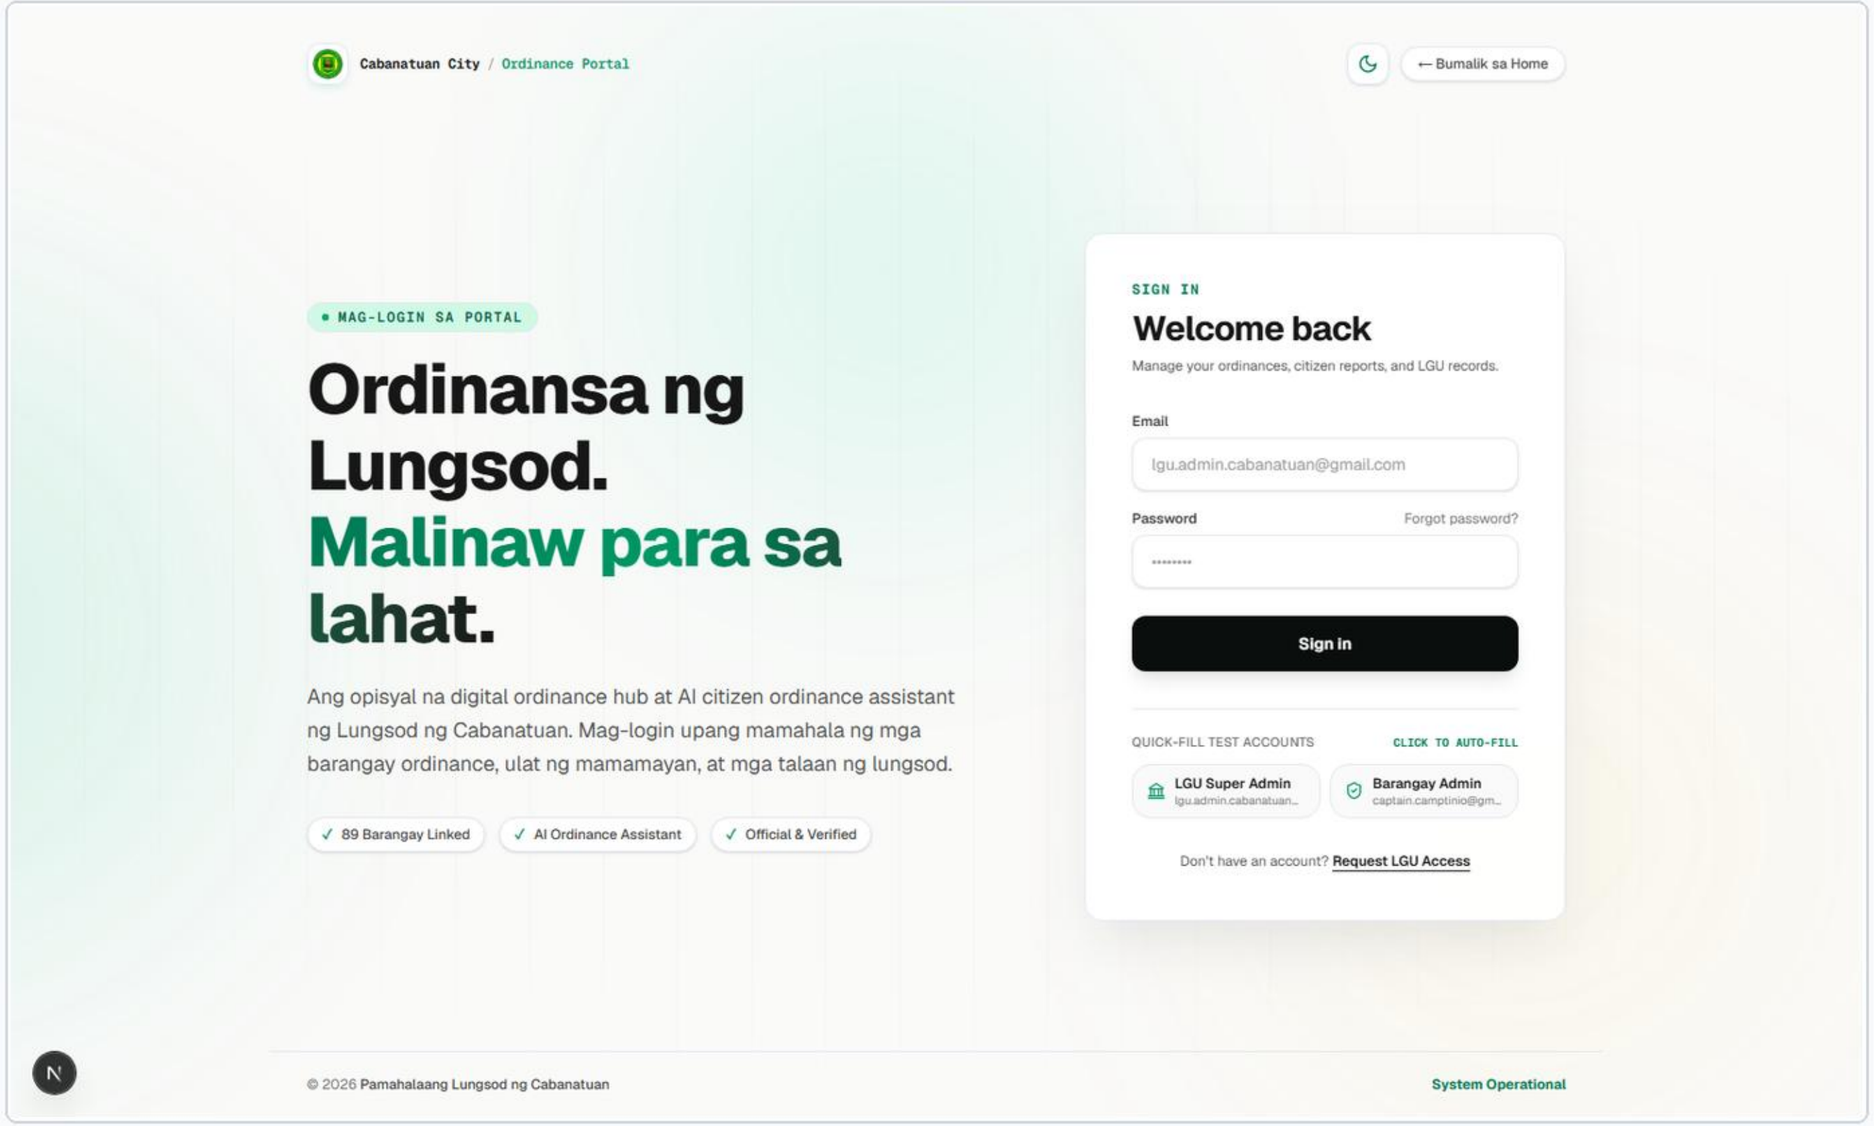

[5] Public Footer: LGU contact details, transparency seal, and legal notices

ChatGPT Wireframing Tip:

Upload this page to ChatGPT & ask: 'Convert this UI screen into a clean low-fidelity ASCII or Tailwind skeleton matching the numbered components.'

Screen #02: System Authentication & Role Sign-In

Universal Access

WIREFRAME SPECIFICATION

Target Route:
/login

Layout Architecture:
Secure authentication card modal supporting role-based sign in for citizens, barangay officials, and city administrators.

Core UI Skeleton Elements:

[1] Modal Backdrop: Dimmed focus overlay with close action

[2] Card Header: Cabanatuan official seal, portal title, and sign-in instructions

[3] Role Selector / Segmented Tabs: Citizen, Barangay Official, City Admin

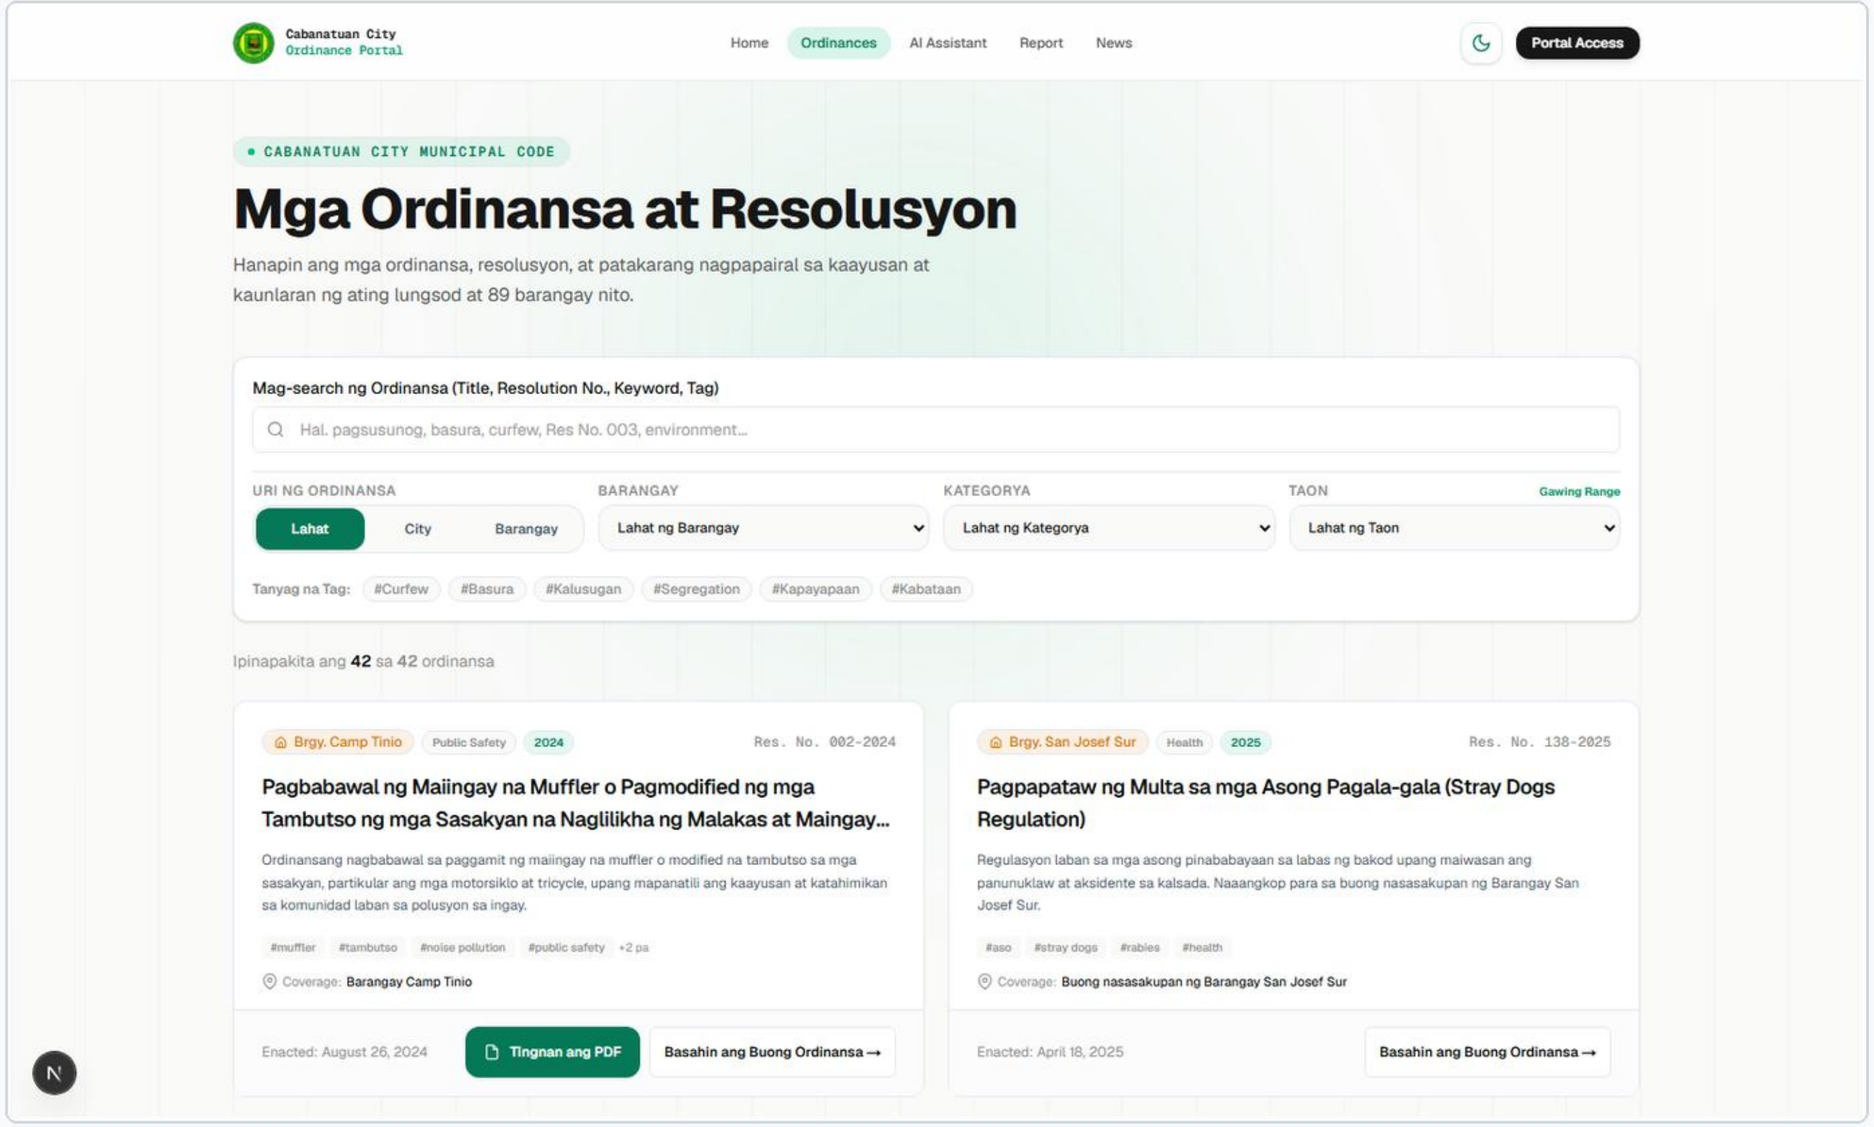

[4] Input Form: Email address, password field with visibility toggle

[5] Action Buttons: Primary 'Sign In' CTA and 'Forgot Password' recovery link

ChatGPT Wireframing Tip:
Upload this page to ChatGPT & ask: 'Convert this UI screen into a clean low-fidelity ASCII or Tailwind skeleton matching the numbered components.'

Screen #03: Public Ordinance Explorer & Filter Engine

Citizen & Public

WIREFRAME SPECIFICATION

Target Route:
/ordinances

Layout Architecture:
Central public repository with faceted category filtering, keyword search, status tags, and paginated ordinance cards.

Core UI Skeleton Elements:

[1] Filter Bar: Keyword search input, category pills (Traffic, Health, Zoning, Safety)

[2] Sorting Controls: Sort by enactment date, ordinance number, or relevance

[3] Ordinance Card Grid: Number badge, title, enactment date, executive summary, category tags

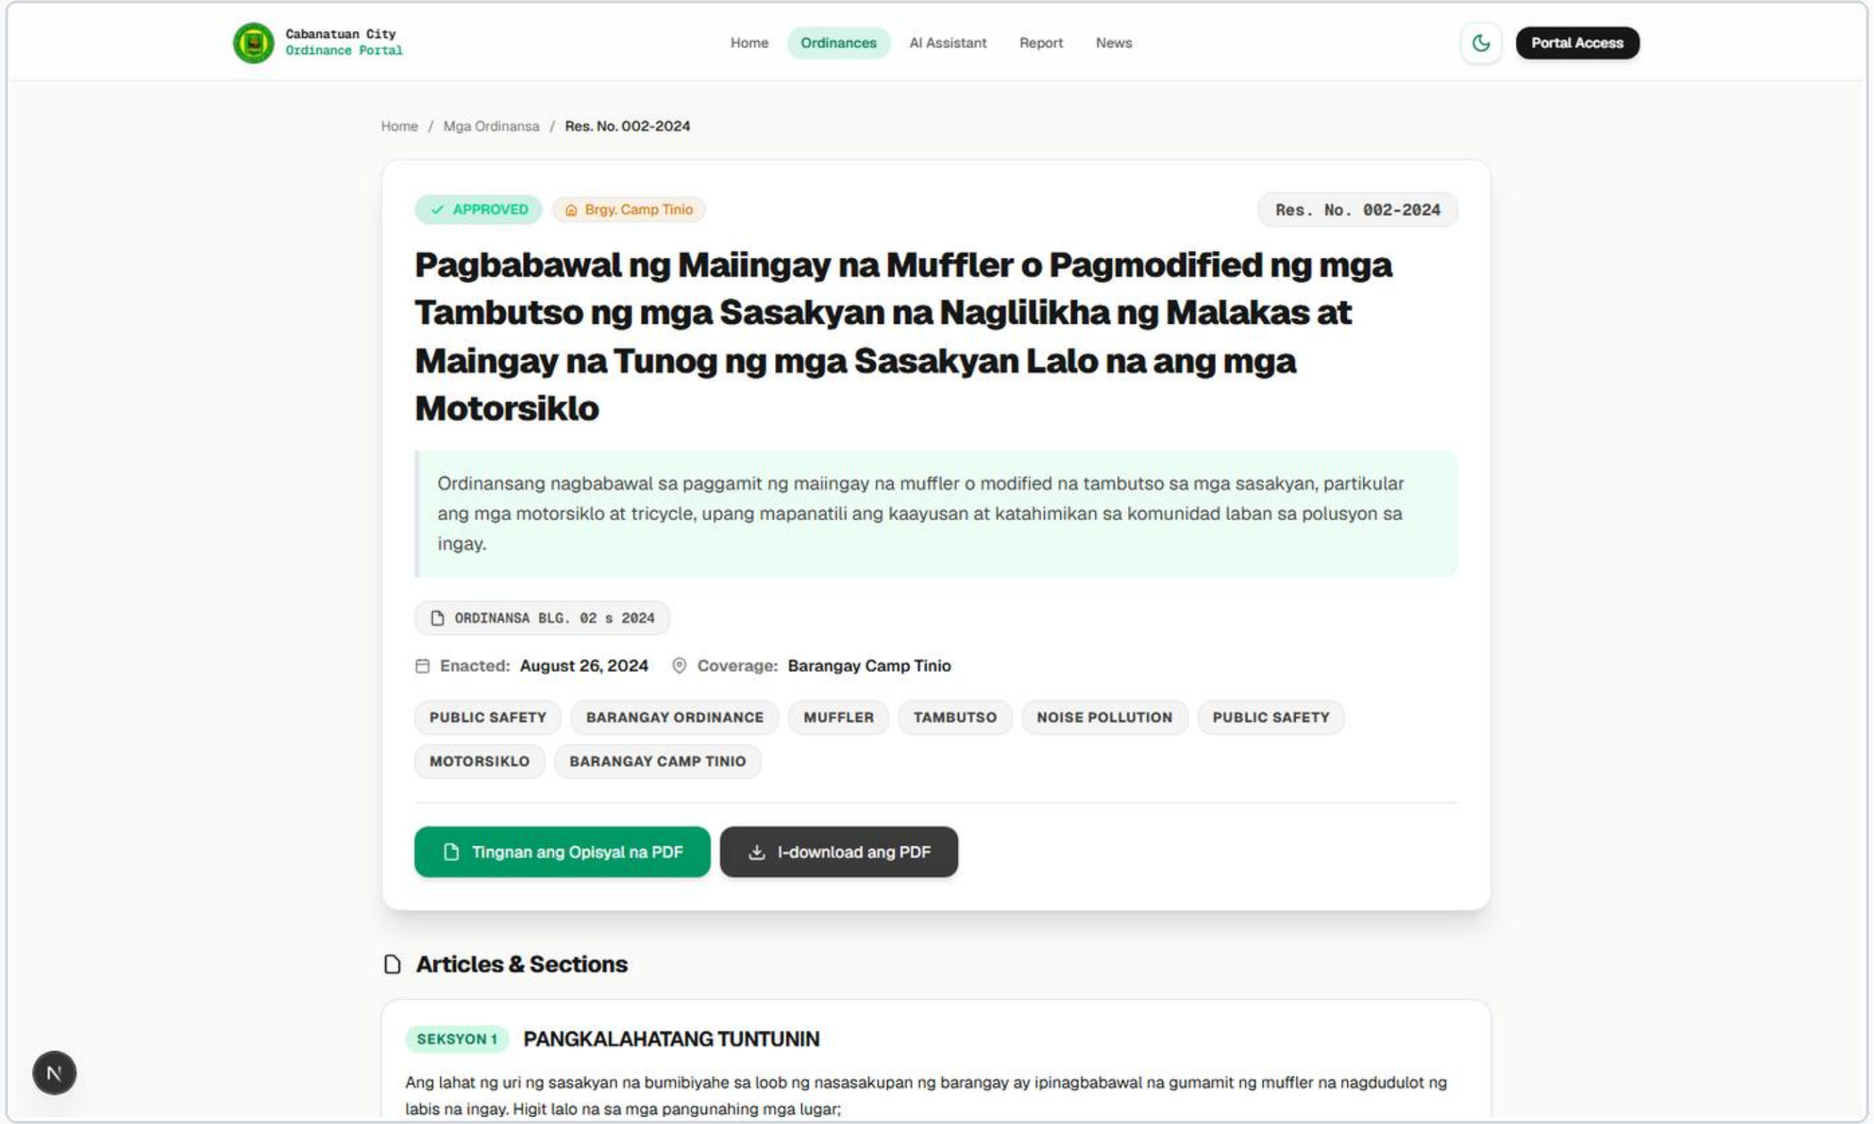

[4] Quick Actions: 'Read Provisions' button and 'Download PDF' quick icon

[5] Pagination Bar: Page number indicators, previous/next controls, and count summary

ChatGPT Wireframing Tip:
Upload this page to ChatGPT & ask: 'Convert this UI screen into a clean low-fidelity ASCII or Tailwind skeleton matching the numbered components.'

Screen #04: Ordinance Document Reader & Provisions

Citizen & Public

WIREFRAME SPECIFICATION

Target Route:
/ordinances/[slug]

Layout Architecture:
Detailed legal document reader showcasing ordinance metadata, section-by-section provisions, sanctions, and PDF viewer access.

Core UI Skeleton Elements:

[1] Breadcrumb Trail: Home > Ordinances > Ordinance Detail

[2] Metadata Banner: Ordinance number, author/sponsor, date approved, effectivity date

[3] Executive Summary Box: Key takeaways in plain language for public comprehension

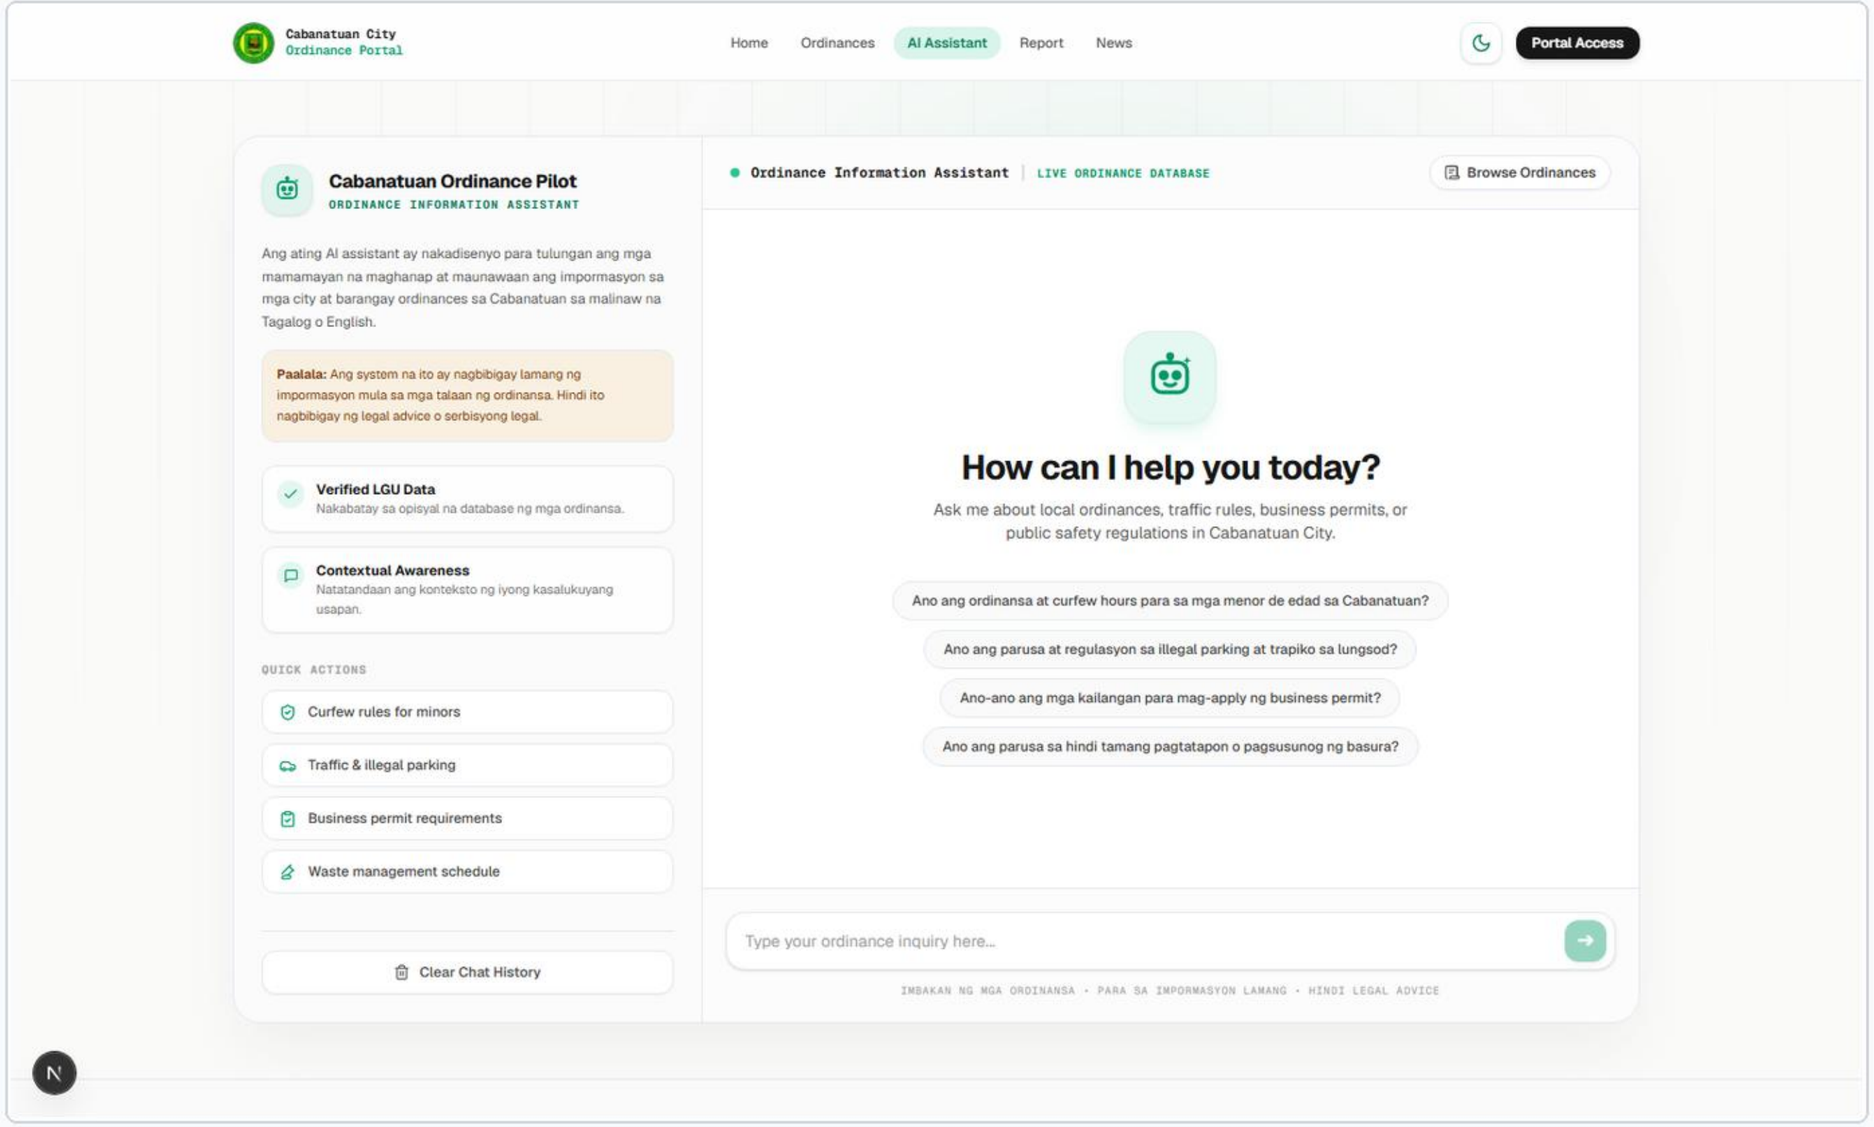

[4] Provisions Content Body: Structured legal sections, articles, and definitions

[5] Sanctions & Penalties Alert: Highlighted violations and corresponding penalties box

ChatGPT Wireframing Tip:
Upload this page to ChatGPT & ask: 'Convert this UI screen into a clean low-fidelity ASCII or Tailwind skeleton matching the numbered components.'

Screen #05: AI Legislative Assistant & Citation Chatbot

Citizen & Public

WIREFRAME SPECIFICATION

Target Route:
/chatbot

Layout Architecture:
Retrieval-Augmented Generation (RAG) conversational legal assistant providing cited answers referencing verified city ordinances.

Core UI Skeleton Elements:

[1] Chat Stream: Chronological conversation message bubbles (User & AI)

[2] Citation Pill Badges: Clickable ordinance reference links citing exact section numbers

[3] Quick Suggestion Chips: Preset FAQ prompts (e.g. curfew hours, noise regulations, tricycle fares)

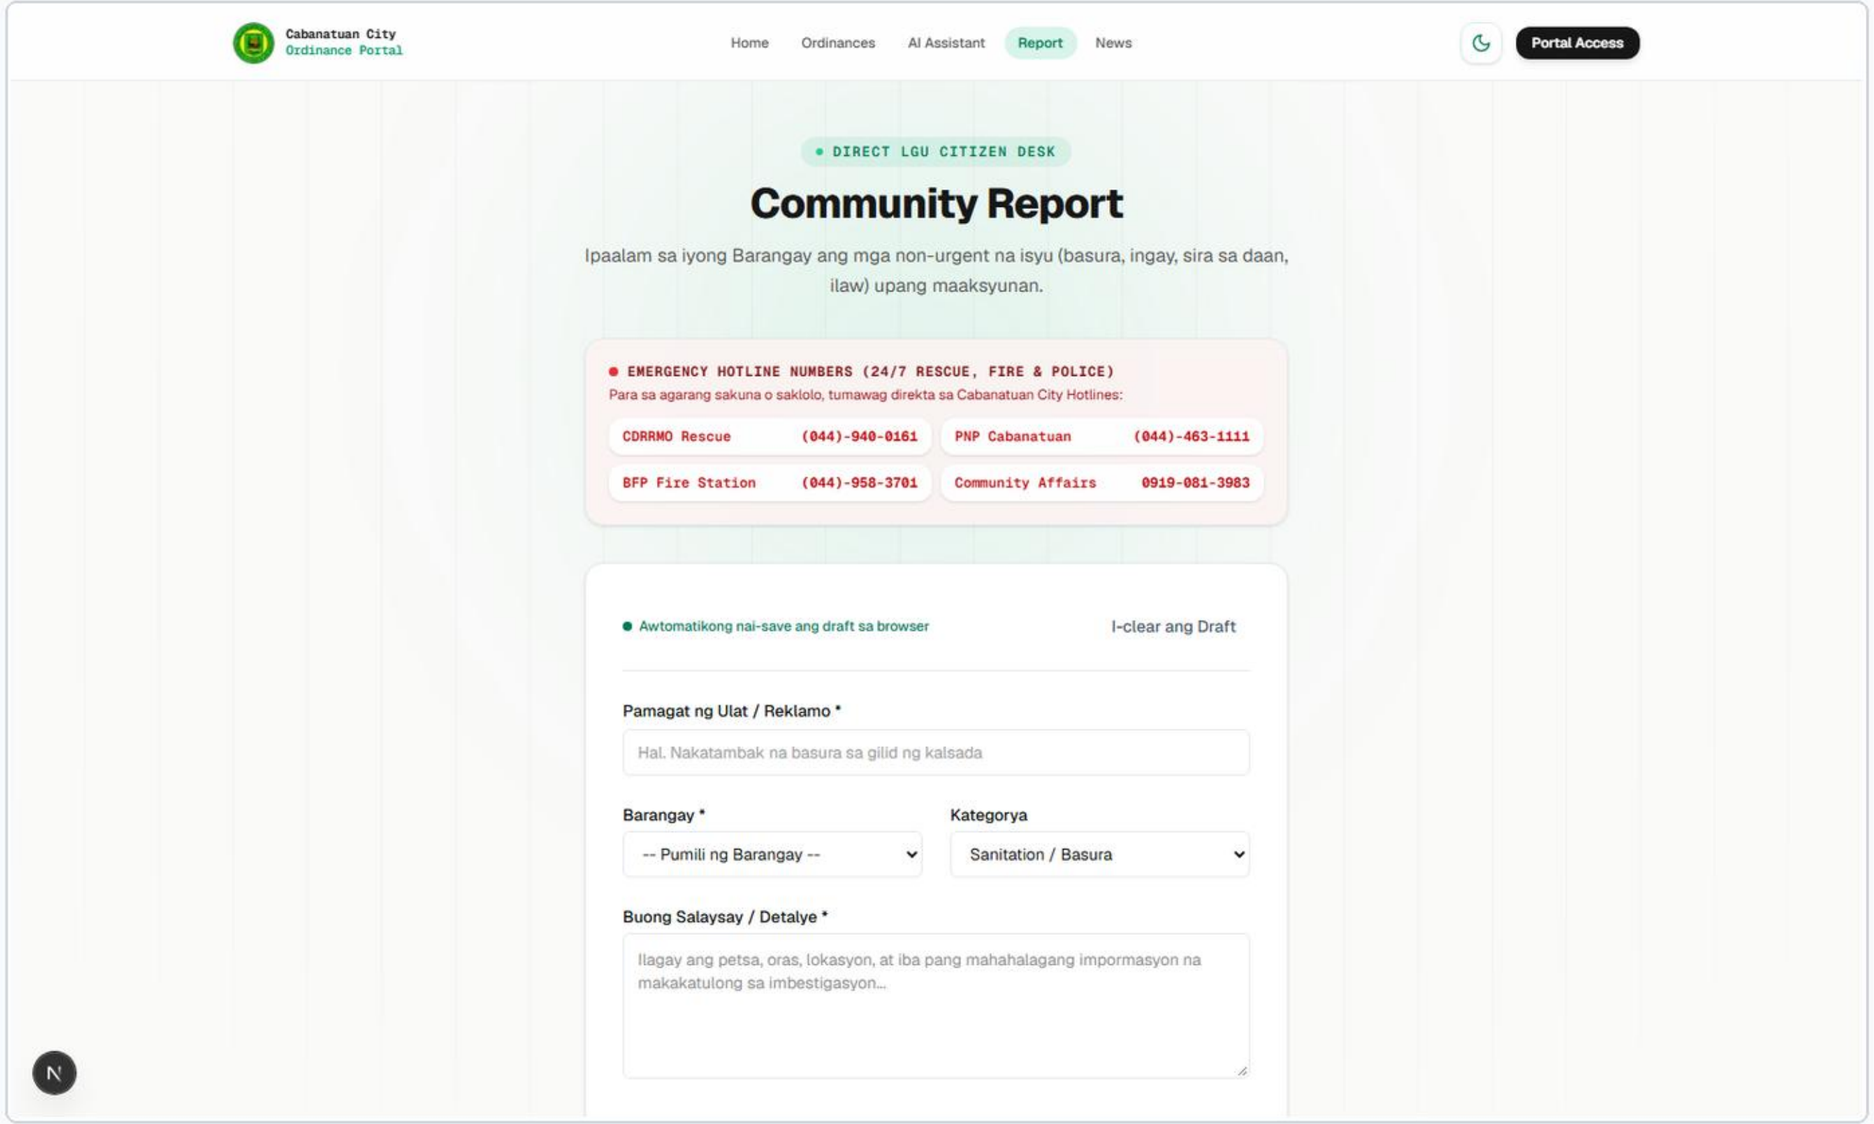

[4] Input Bar: Multi-line text query input, send button, and disclaimer badge

[5] Legal Disclaimer: Automated AI assistance notice advising confirmation with official texts

ChatGPT Wireframing Tip:
Upload this page to ChatGPT & ask: 'Convert this UI screen into a clean low-fidelity ASCII or Tailwind skeleton matching the numbered components.'

Screen #06: Citizen Incident & Violation Report Form

Citizen & Public

WIREFRAME SPECIFICATION

Target Route:
/report

Layout Architecture:
Community incident and violation submission interface with photo uploader, barangay tagging, geolocation, and anonymous toggle.

Core UI Skeleton Elements:

[1] Header Card: Purpose description and community reporting guidelines

[2] Category Dropdown: Violation type (e.g., Illegal Parking, Noise Curfew, Waste Disposal)

[3] Location Selectors: Specific Barangay selector and street/landmark input field

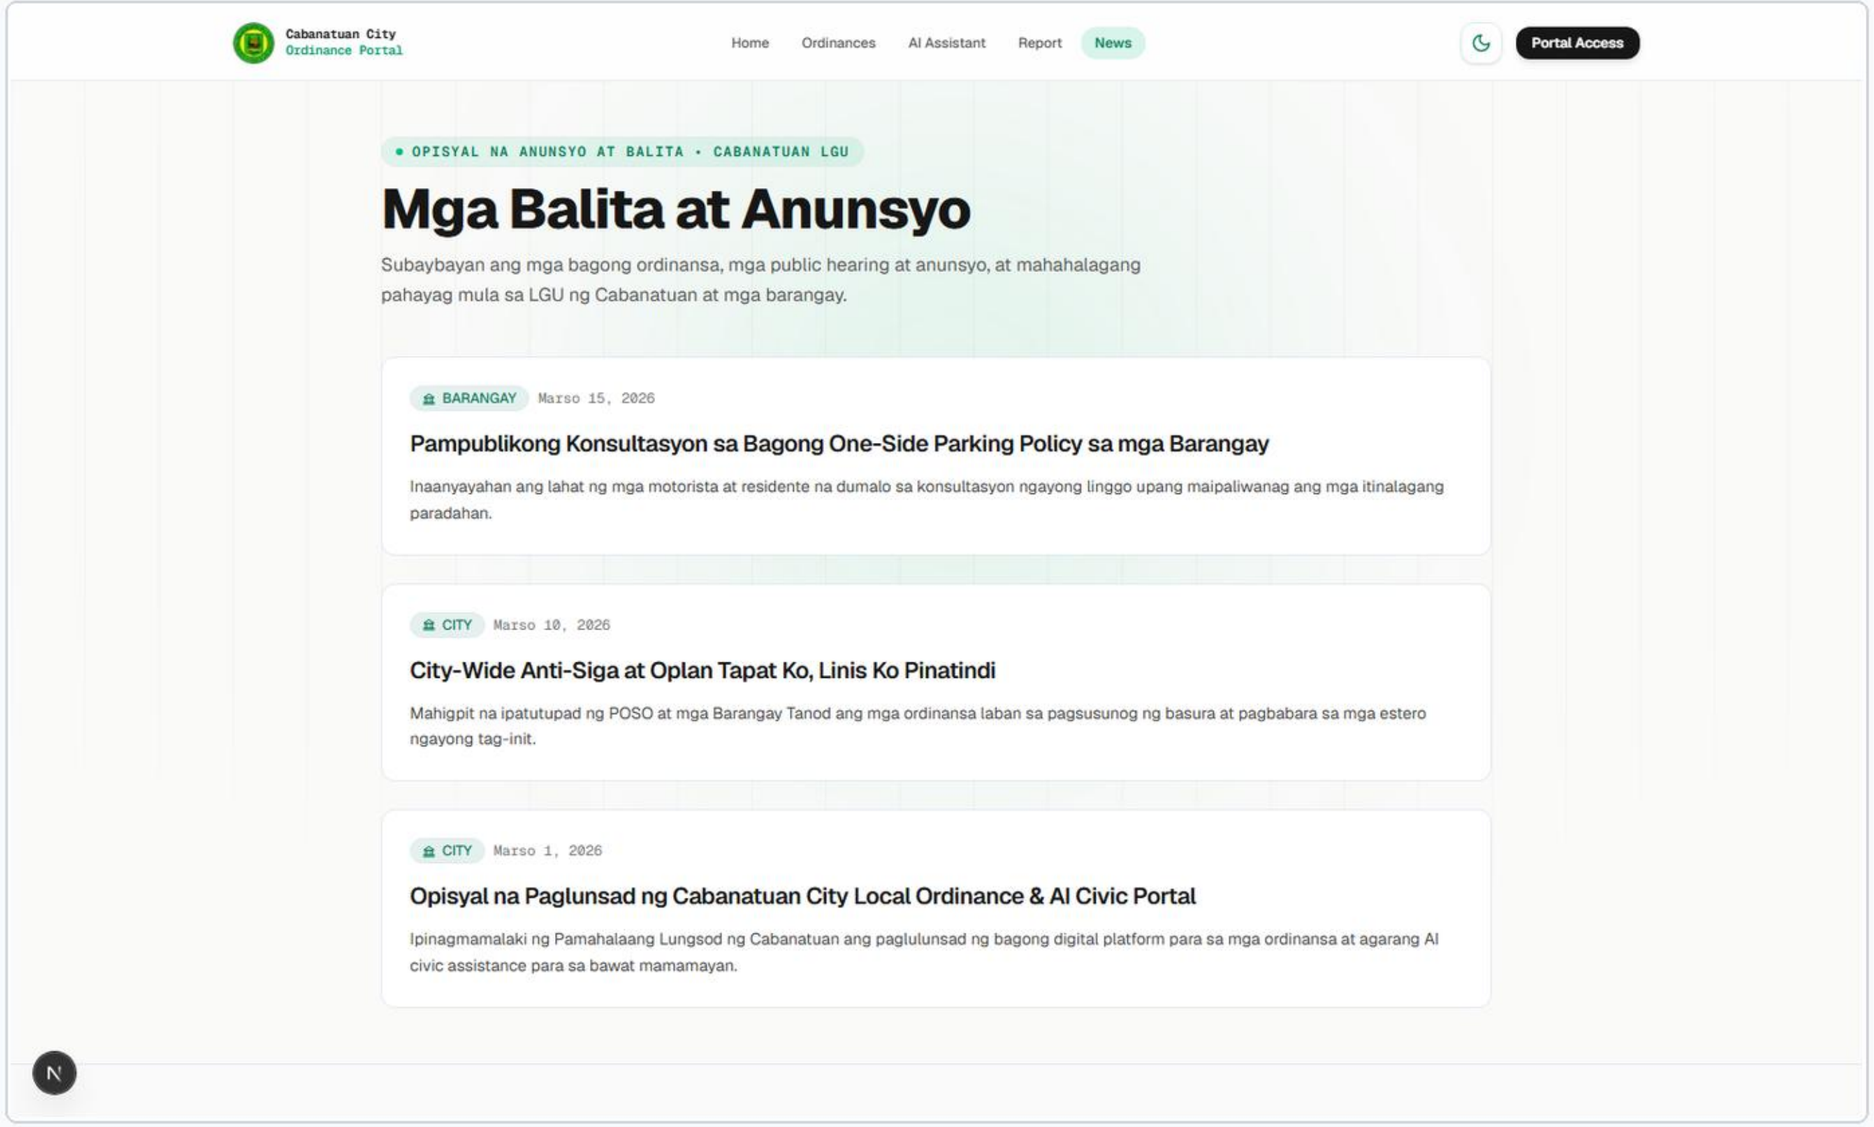

[4] Incident Narrative: Detailed description textarea

[5] Evidence Attachment Area: Drag-and-drop photo uploader with preview thumbnails

ChatGPT Wireframing Tip:
Upload this page to ChatGPT & ask: 'Convert this UI screen into a clean low-fidelity ASCII or Tailwind skeleton matching the numbered components.'

Screen #07: Civic News & Announcements Bulletin

Citizen & Public

WIREFRAME SPECIFICATION

Target Route:
/news

Layout Architecture:
Public civic updates bulletin featuring official announcements, public hearing notices, and executive community orders.

Core UI Skeleton Elements:

[1] Featured Spotlight Card: Hero banner for high-priority city announcements

[2] Filter Pills: All, Public Hearings, Advisory, Community Notices, Traffic Updates

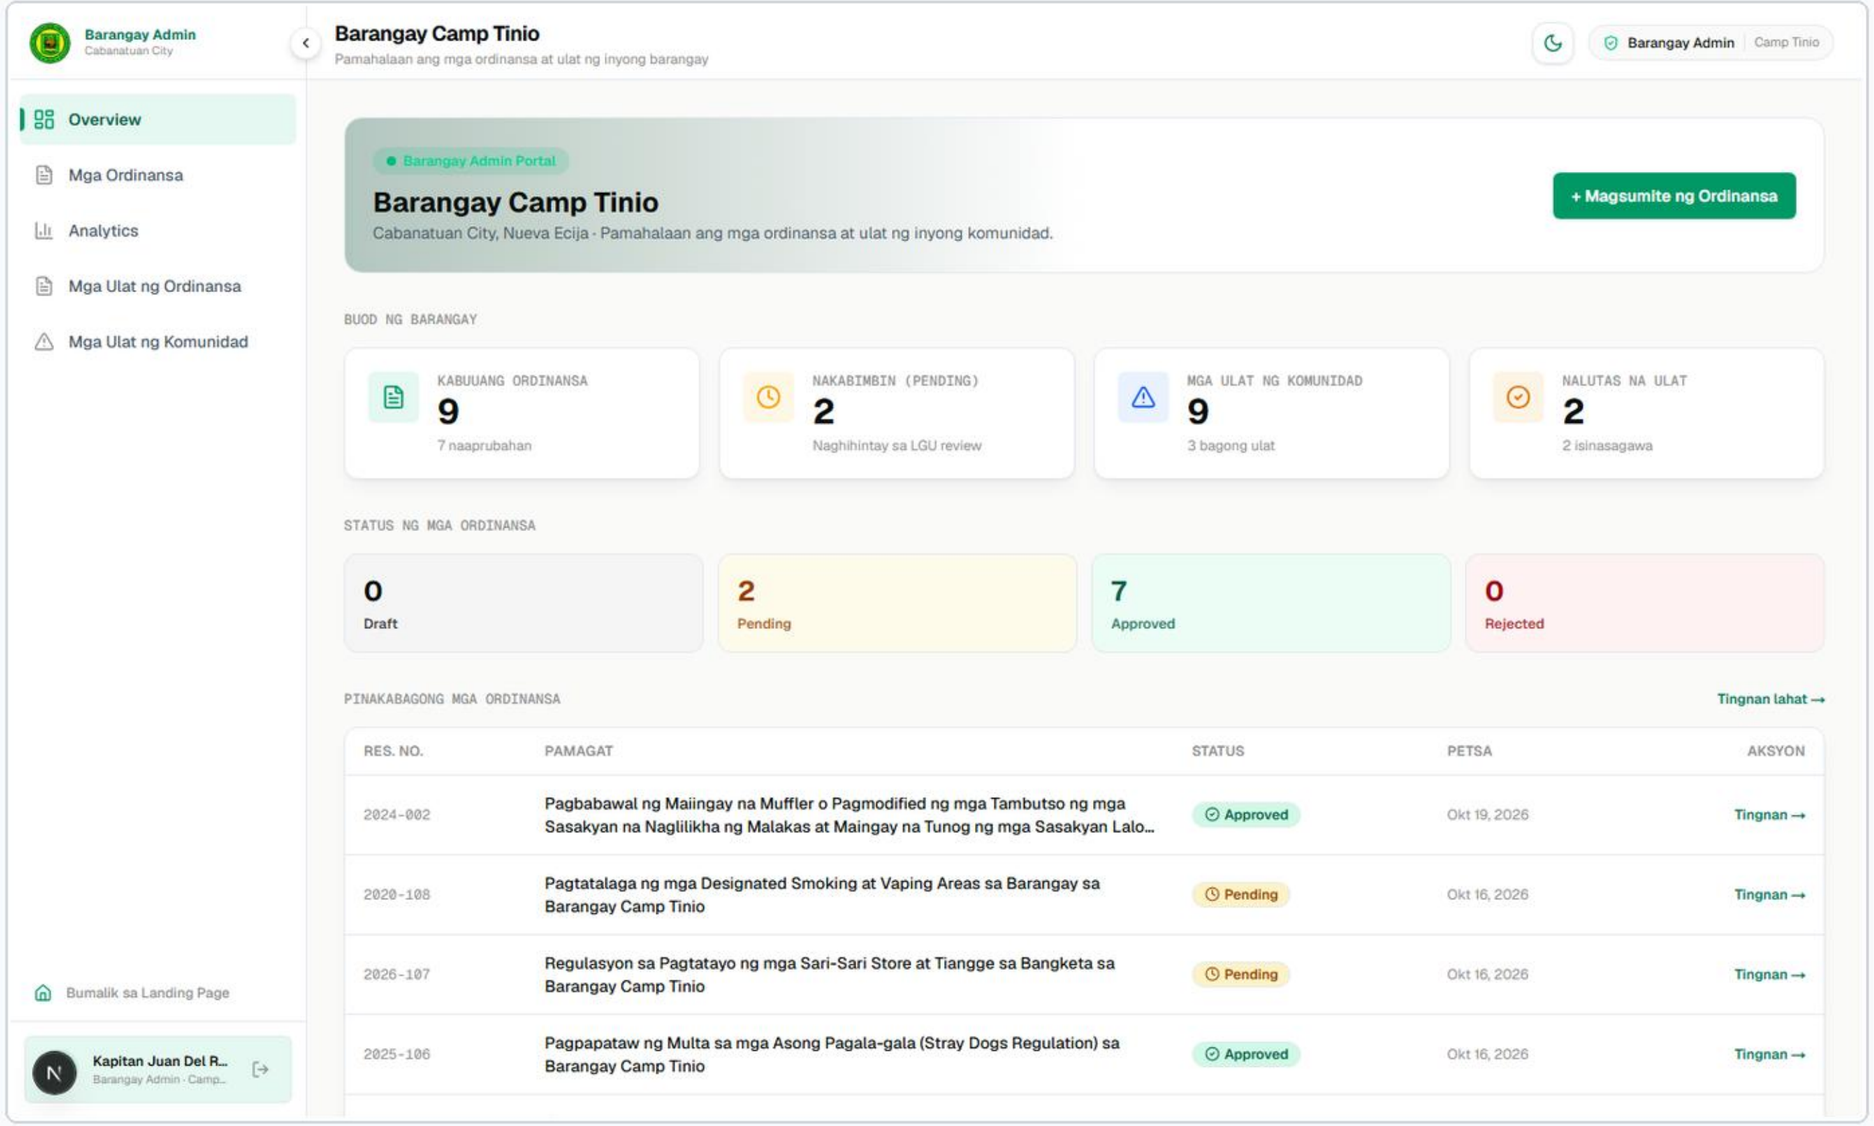

[3] News Cards Grid: 3-column card layout with thumbnail image, date badge, title, excerpt

[4] Article Footer: Read More button, sharing links, and author attribution

ChatGPT Wireframing Tip:
Upload this page to ChatGPT & ask: 'Convert this UI screen into a clean low-fidelity ASCII or Tailwind skeleton matching the numbered components.'

Screen #08: Barangay Admin - Operational Dashboard

Barangay Admin

WIREFRAME SPECIFICATION

Target Route:
/admin/barangay

Layout Architecture:
Operational home for barangay officials with KPI summary statistics, pending review queues, and recent community incident tickets.

Core UI Skeleton Elements:

[1] Sidebar Navigation: Dashboard, Ordinances, Community Reports, Analytics, Settings

[2] Header Bar: Barangay identifier badge, quick notifications, user profile menu

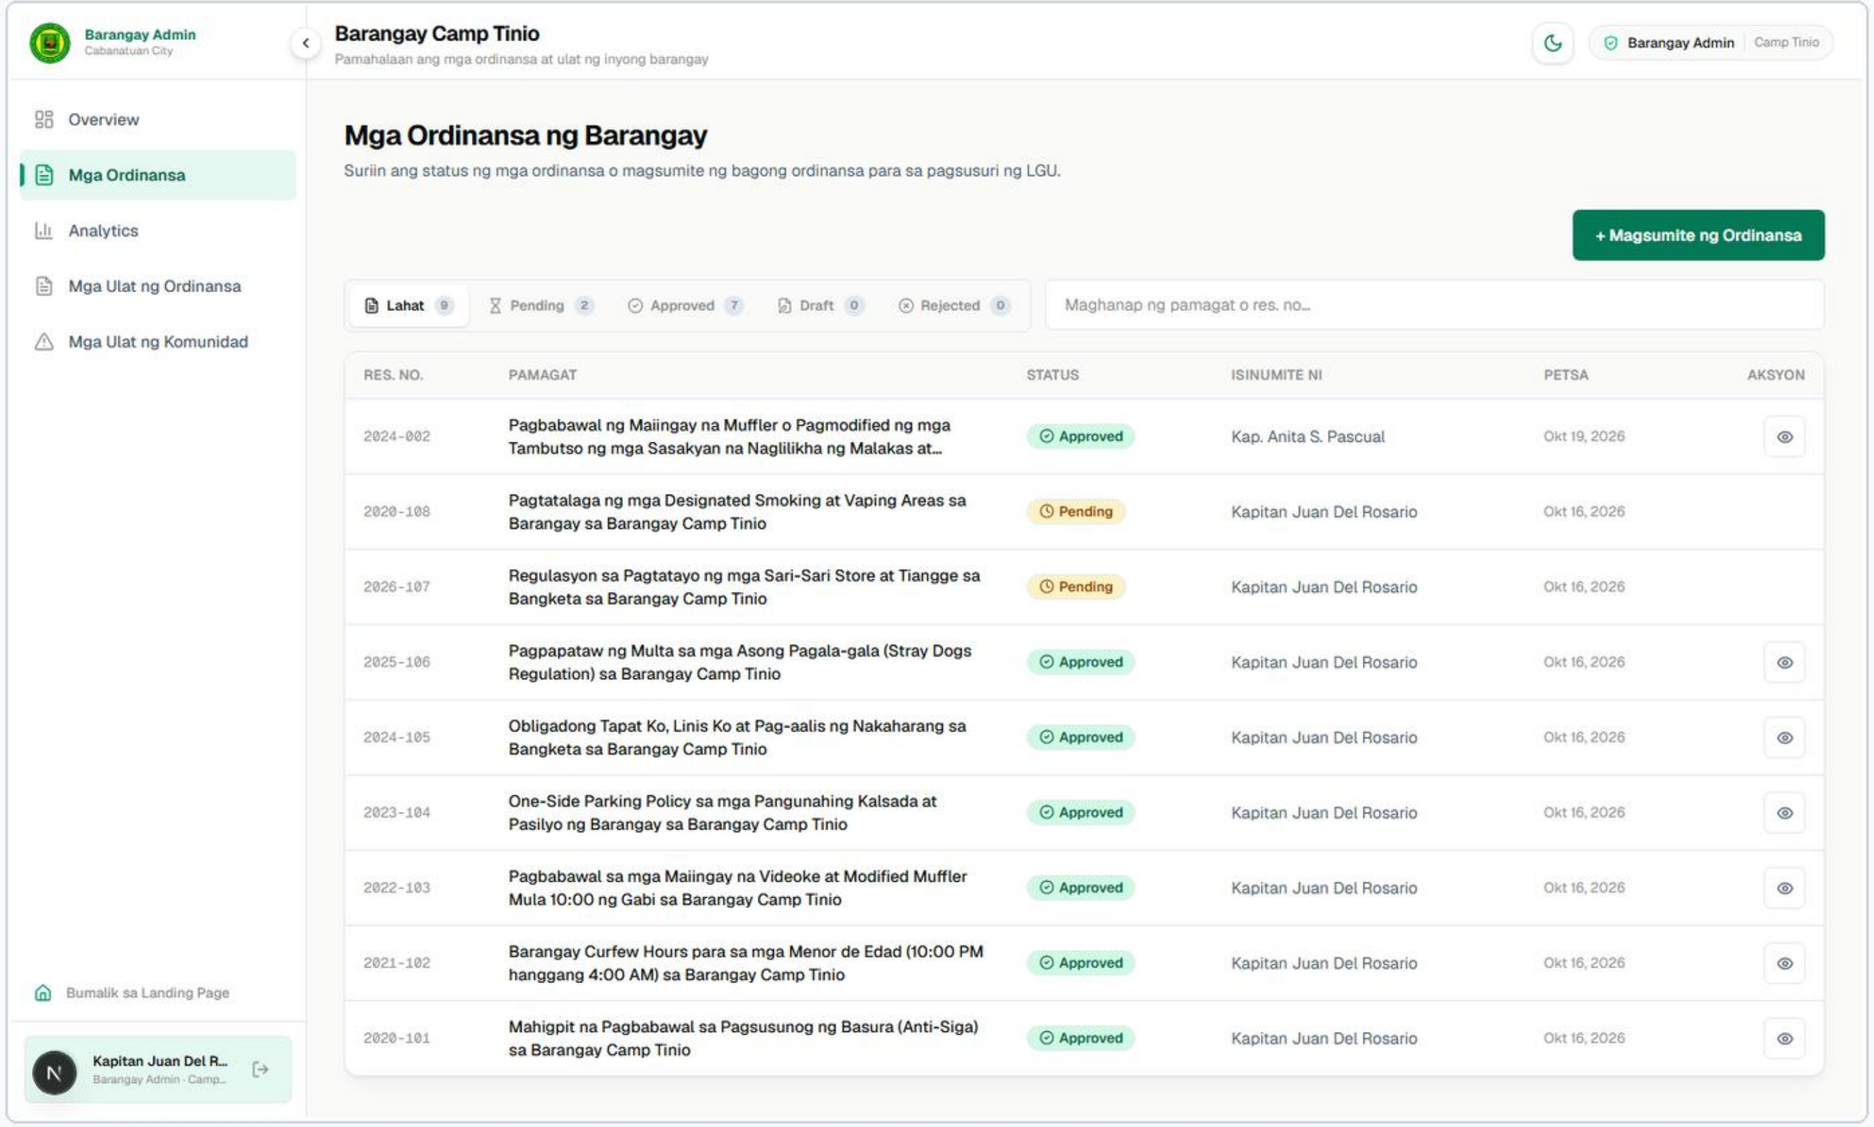

[3] KPI Metric Cards: Total Local Ordinances, Active Community Reports, Pending LGU Submissions, Resolution Rate

[4] Recent Activity Feed: Chronological log of recent ordinance drafts and status changes

[5] Pending Incident Queue: Quick-access table of urgent citizen reports awaiting triage

ChatGPT Wireframing Tip:
Upload this page to ChatGPT & ask: 'Convert this UI screen into a clean low-fidelity ASCII or Tailwind skeleton matching the numbered components.'

Screen #09: Barangay Admin - Ordinance Registry & Drafting

WIREFRAME SPECIFICATION

Target Route:
/admin/barangay/ordinances

Layout Architecture:
Barangay ordinance registry interface with status filters (Draft, Submitted, Enacted) and new draft ordinance creation action.

Core UI Skeleton Elements:

[1] Action Toolbar: Search input, status filter tabs (All, Draft, Submitted to LGU, Enacted)

[2] Primary CTA: '+ Draft New Ordinance' modal launcher button

[3] Registry Table: Columns for Ordinance No., Title, Category, Submission Date, Workflow Status Badge

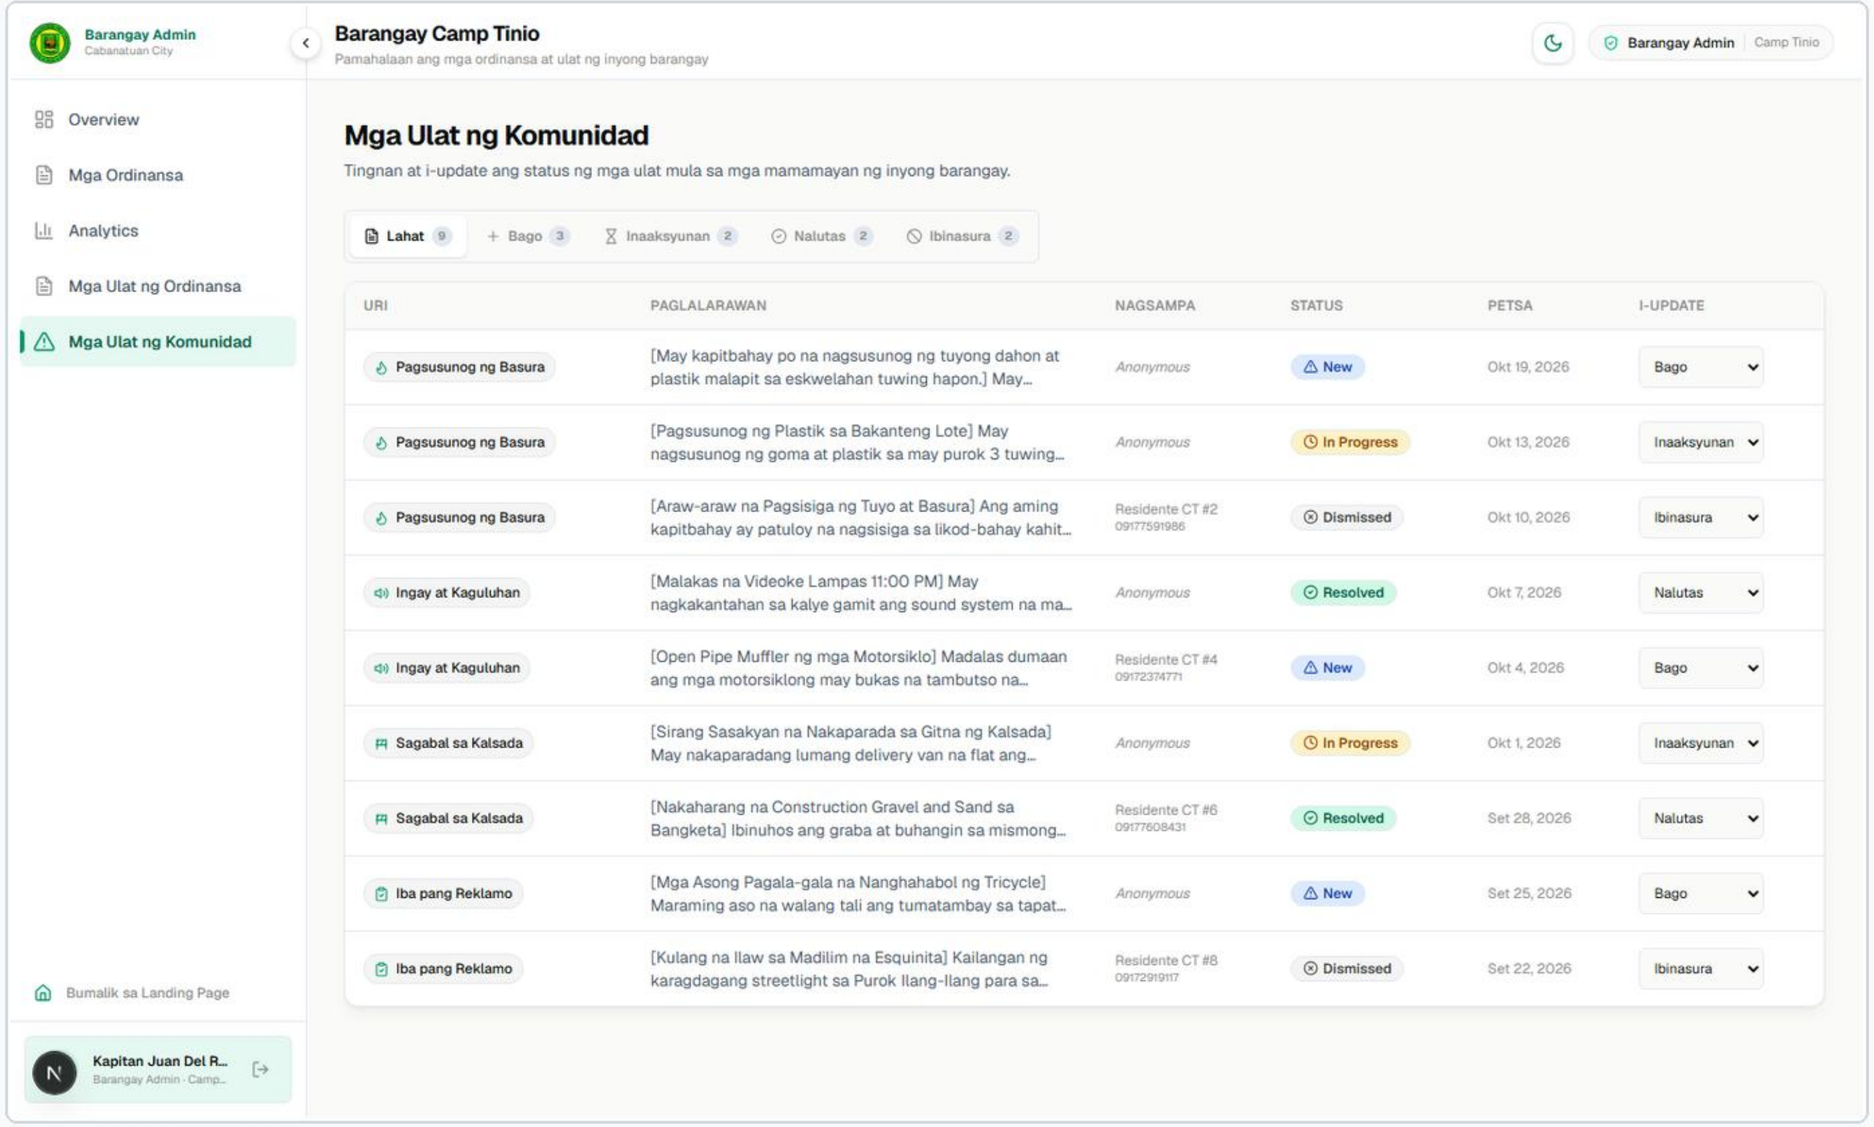

[4] Row Actions: Edit draft, upload PDF document, submit to City LGU review, delete draft

[5] Table Pagination: Page selector and row count summary

ChatGPT Wireframing Tip:
Upload this page to ChatGPT & ask: 'Convert this UI screen into a clean low-fidelity ASCII or Tailwind skeleton matching the numbered components.'

Screen #10: Barangay Admin - Incident Triage & Resolution Modal

Barangay Admin

WIREFRAME SPECIFICATION

Target Route:
/admin/barangay/reports (modal)

Layout Architecture:
Detailed triage modal allowing barangay officials to inspect citizen reports, review photo evidence, and update verification status.

Core UI Skeleton Elements:

[1] Modal Dialog: Focused popup over blurred admin table background

[2] Report Header: Ticket ID, submission timestamp, and reporter contact (or 'Anonymous')

[3] Evidence Viewer: Full photo evidence preview with zoom capability

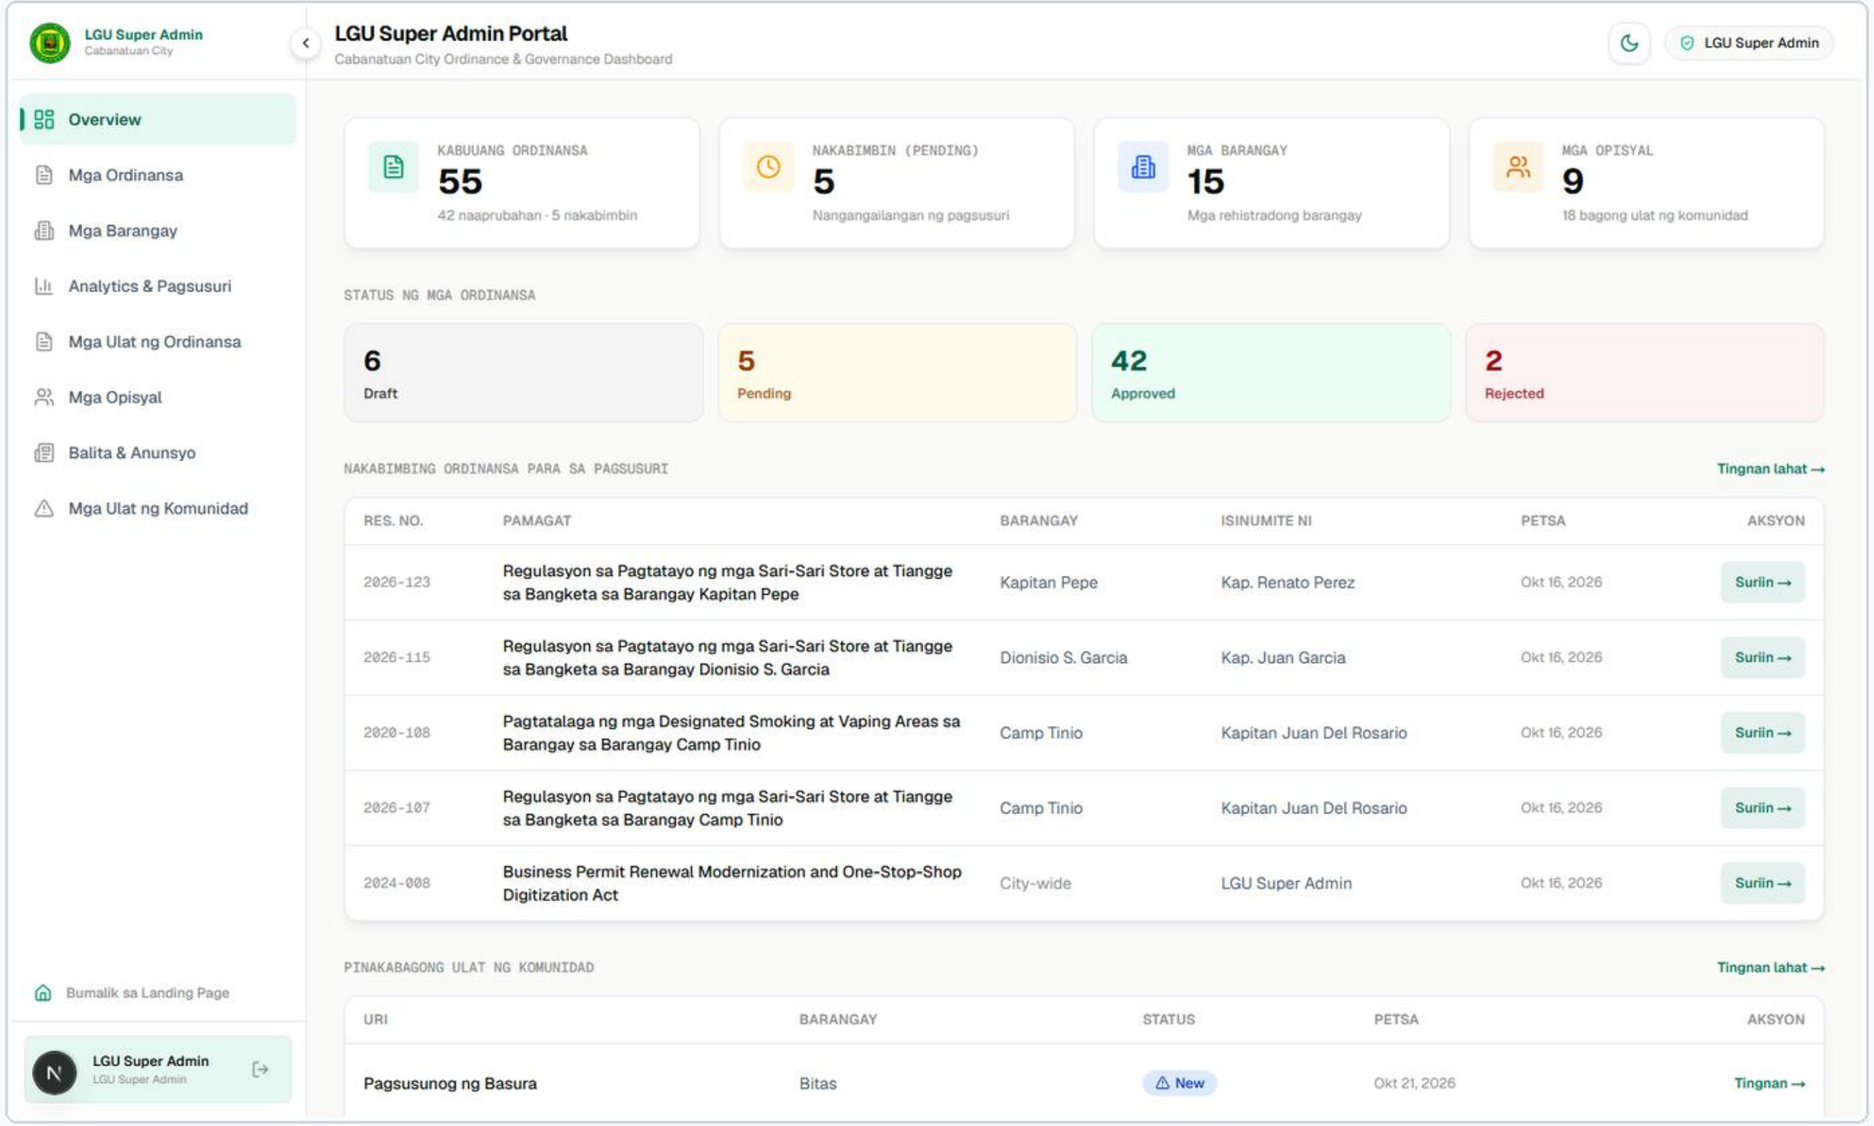

[4] Status Selector: Radio / dropdown (Pending, Under Investigation, Resolved, Dismissed)

[5] Official Notes: Officer inspection remarks and action taken textarea

ChatGPT Wireframing Tip:
Upload this page to ChatGPT & ask: 'Convert this UI screen into a clean low-fidelity ASCII or Tailwind skeleton matching the numbered components.'

Screen #11: LGU City Admin - Executive Oversight Dashboard

City LGU Admin

WIREFRAME SPECIFICATION

Target Route:
/admin/lgu

Layout Architecture:
City-wide executive console displaying high-level legislative metrics, pending barangay ordinance approvals, and city incident trends.

Core UI Skeleton Elements:

[1] Admin Sidebar: Executive Dashboard, Ordinance Repository, Review Workflow, User Management, Barangays, Reports, News, Analytics

[2] Executive KPI Strip: Total City Ordinances, Registered Barangays, Pending Legislative Reviews, Total Community Incidents

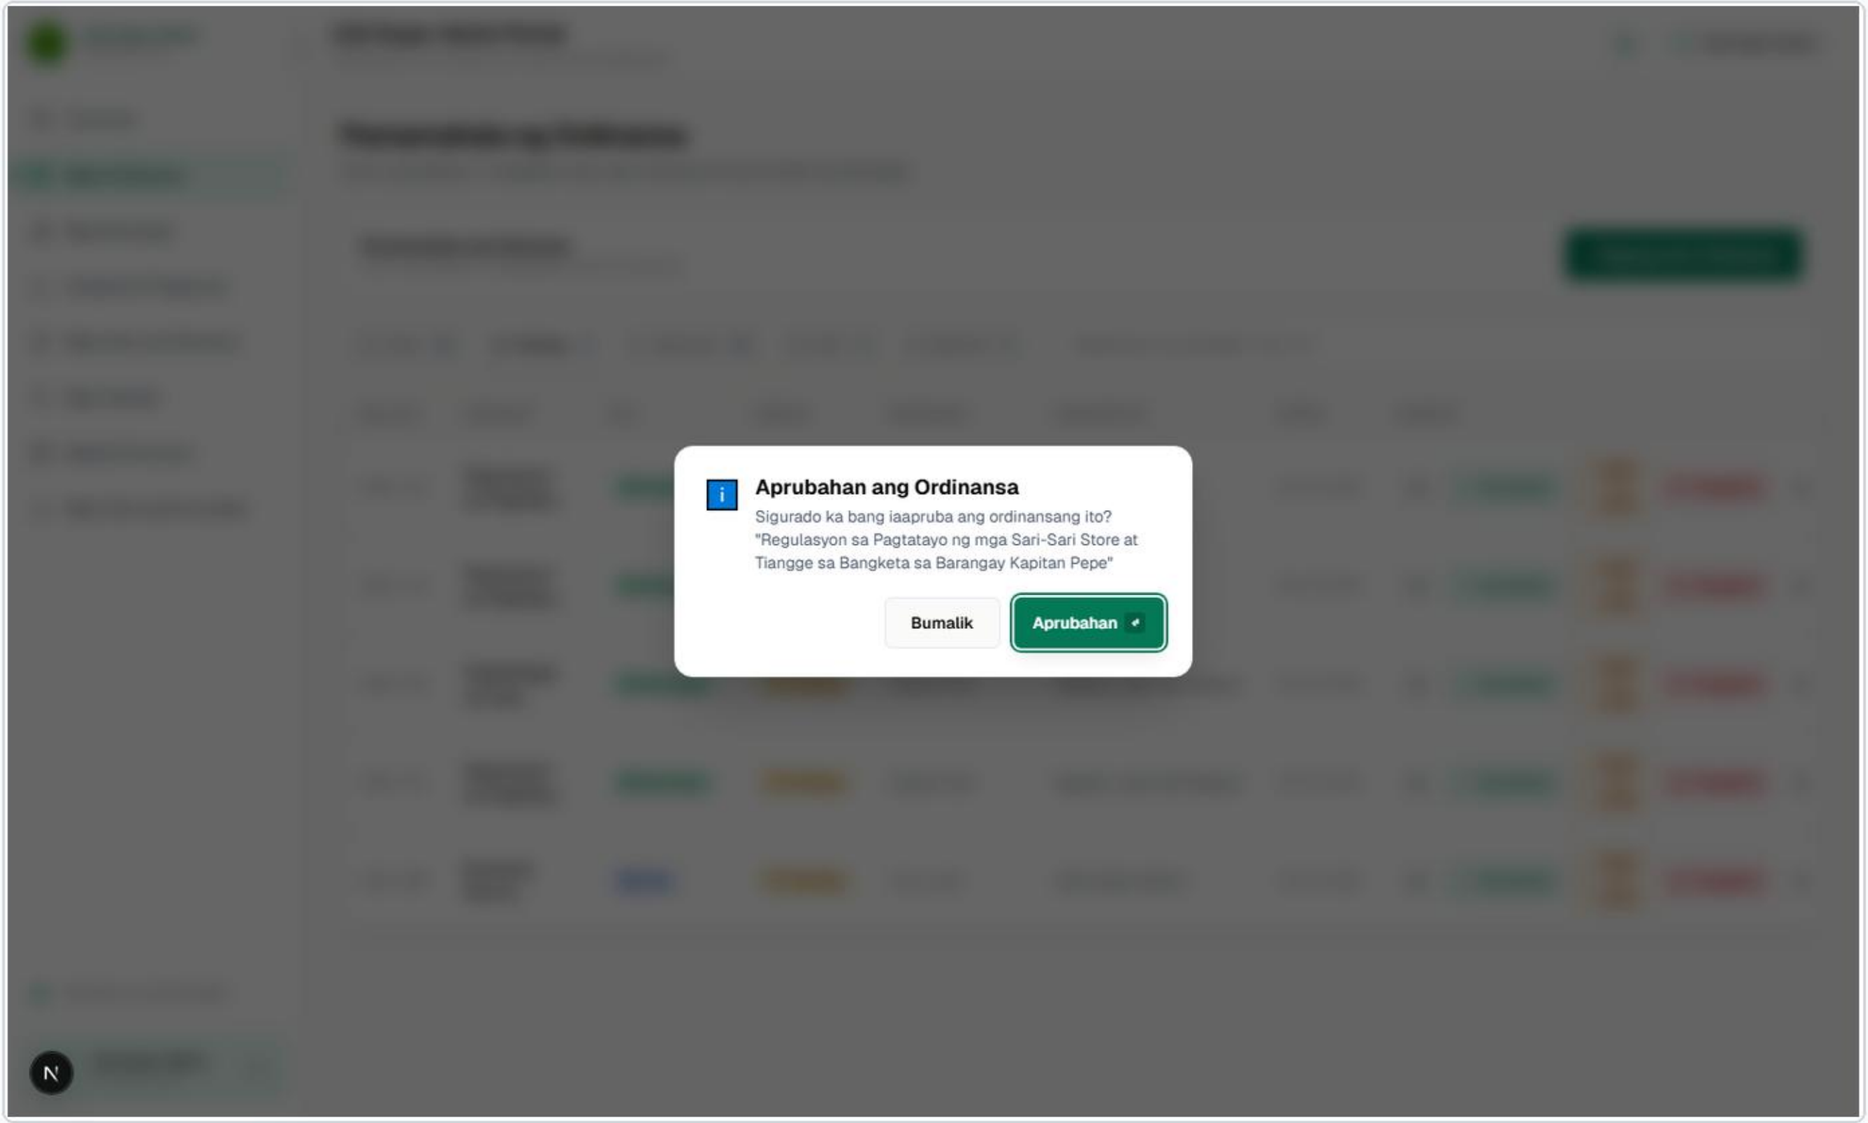

[3] Legislative Review Urgent Queue: High-priority table of ordinances awaiting City Council action

[4] Barangay Submission Activity: Quick-glance status indicators across all city districts

ChatGPT Wireframing Tip:
Upload this page to ChatGPT & ask: 'Convert this UI screen into a clean low-fidelity ASCII or Tailwind skeleton matching the numbered components.'

Screen #12: LGU City Admin - Legislative Review & Approval Modal

City LGU Admin

WIREFRAME SPECIFICATION

Target Route:
/admin/lgu/ordinances (modal)

Layout Architecture:
Official legislative review modal for Sangguniang Panlungsod approval, compliance validation, and revision request feedback.

Core UI Skeleton Elements:

[1] Modal Header: Draft Ordinance title, originating barangay, and submission date

[2] Document Preview: Legal provisions summary and AI-extracted compliance parameters

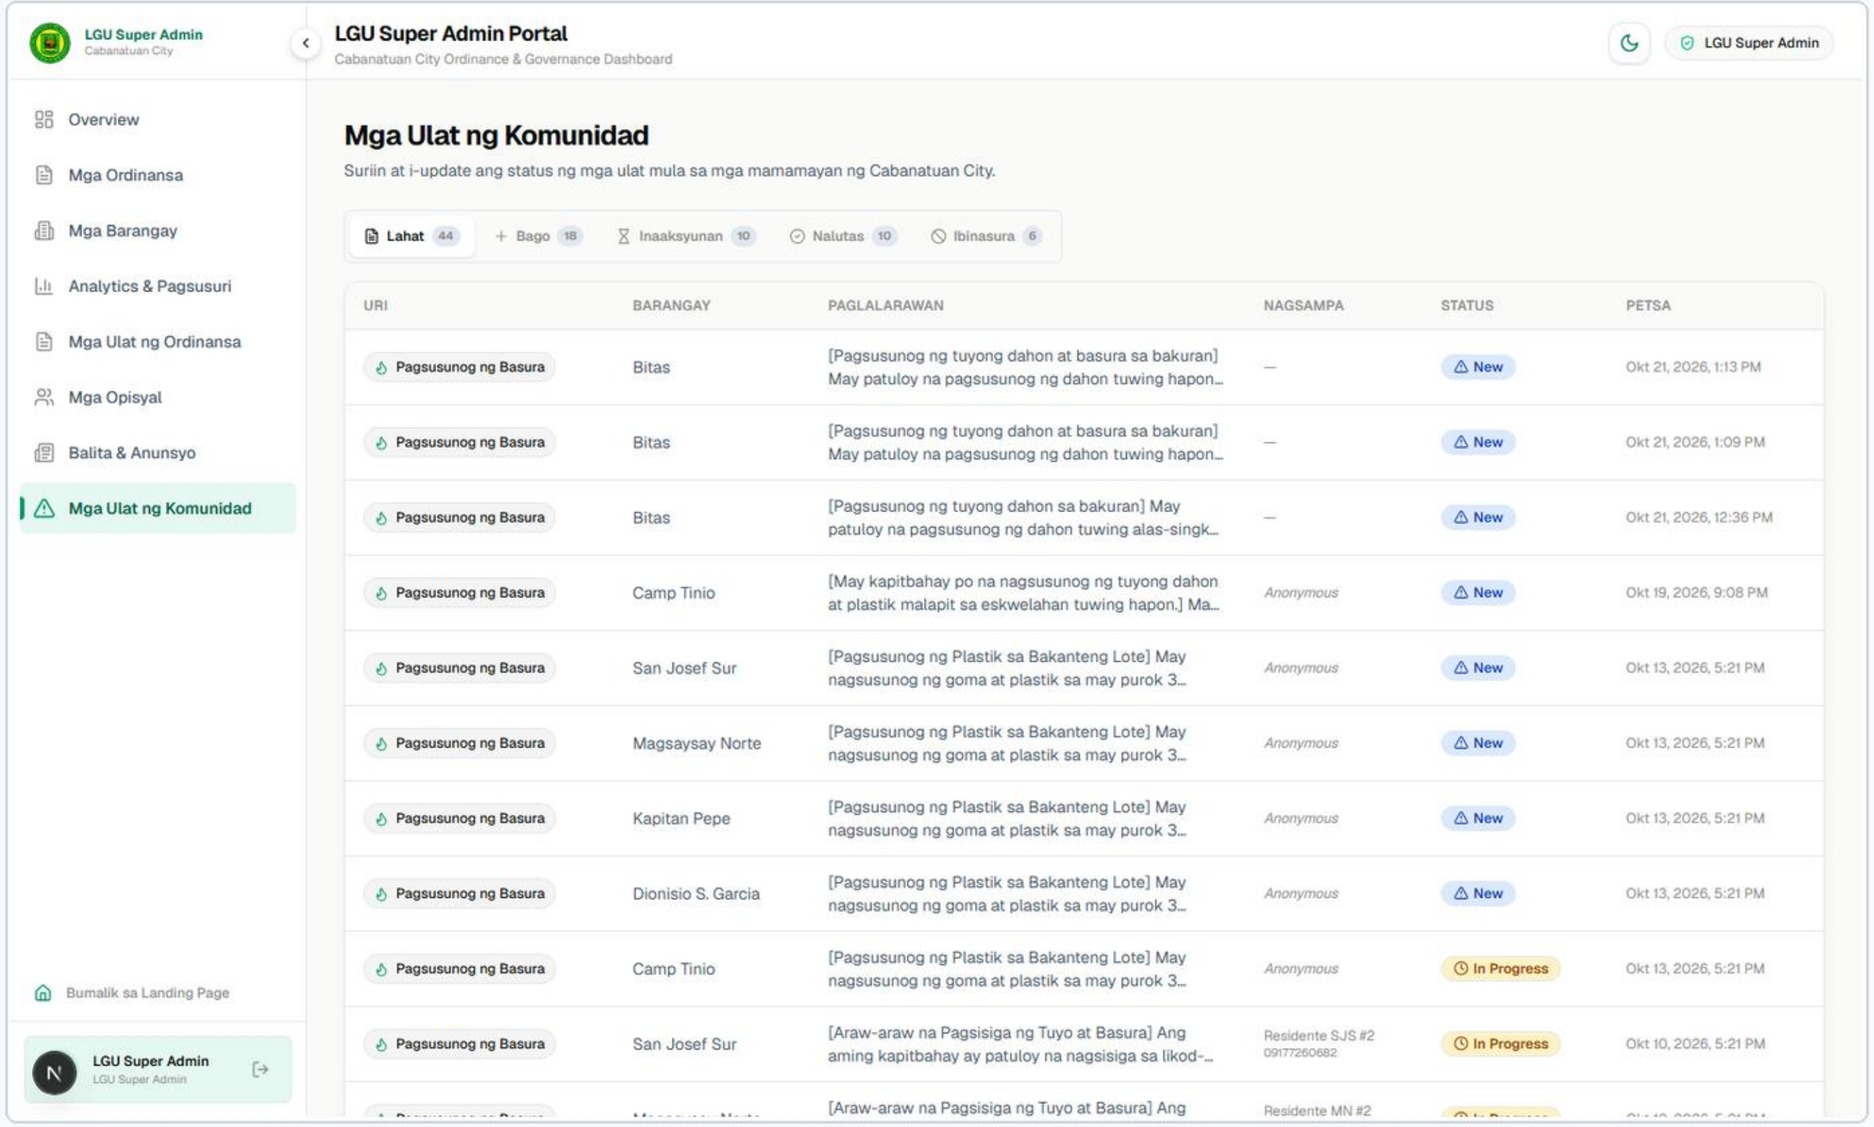

[3] Council Review Remarks: Rich text feedback box for revision notes or commendations

[4] Approval Action Bar: 'Approve & Enact' (Success), 'Request Revisions' (Warning), 'Reject' (Danger), 'Cancel'

ChatGPT Wireframing Tip:
Upload this page to ChatGPT & ask: 'Convert this UI screen into a clean low-fidelity ASCII or Tailwind skeleton matching the numbered components.'

Screen #13: LGU City Admin - City-wide Reports & Incident Monitoring

City LGU Admin

WIREFRAME SPECIFICATION

Target Route:
/admin/lgu/reports

Layout Architecture:
City-wide monitoring system aggregating reports from all 89 barangays with multi-level filtering and status tracking.

Core UI Skeleton Elements:

[1] Filter Controls: Barangay district dropdown, category selector, date range picker, and resolution status tabs

[2] Summary Metric Badges: Open Incidents, Under Investigation, Resolved, Average Resolution Time

[3] Master Incidents Table: Ticket ID, Date, Barangay, Category, Description Excerpt, Current Status Badge, Action View Button

[4] Export Tools: Export to CSV / PDF report buttons

ChatGPT Wireframing Tip:
Upload this page to ChatGPT & ask: 'Convert this UI screen into a clean low-fidelity ASCII or Tailwind skeleton matching the numbered components.'

Screen #14: LGU City Admin - Legislative Analytics & Trends
